CPD Overview

SAVORTEX® is a multi-award-winning British hand hygiene technology manufacturer. We hold a Guinness World Record for the world's most energy-efficient hand dryer.

In collaboration with Intel®, we have developed the next-generation eco-friendly and first SMART hand dryers and hand sanitiser dispensers that help our clients save significant energy up to 88% and cost up to 98% vs. paper towels, and operational costs to meet sustainability targets.

Our video-connected hand dryers and sanitiser dispensers' have in-built screens that can display full-motion video messages to users as they dry their hands for internal marketing or to generate advertising revenues.

Review our product pages to see the benefits of our range: <https://www.savortex.com/products/hand-dryers/>. You can read what our customers are saying on our website: <https://www.savortex.com>
