CPD Overview

Available CPD Material (2)

Multiple formats

Pumping Stations

This CPD will provide delegates with information on when a pumping station is needed and the points to be considered in the system selection and design. By the end of the CPD you should have a greater understanding of:

- The operation and function of a pumping station
- Design considerations
- Installation process
- Maintenance and after-care
- Statutory issues and legislation

Material type: Online Learning, Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

NLU - Pumping Stations (old)

This seminar is concerned with the functionality of pumping stations, their design, installation, operation, and maintenance. It will help you to understand the following topics

- The functionality of a pumping station and what a pumping station is composed of
- Your options when selecting a pumping station
- What is Sewers for Adoption
- The design considerations of a pumping station
- The selection process
- The installation processes
- How pumping stations operate
- The requirements of maintaining a pumping station
- The statutory issues where relevant

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness
