CPD Overview

At Planet Partitioning we design, manufacture, supply and install demountable partitioning systems, acoustic and fire performance partitioning and doors.

An innovative business with over 40 years' experience, we work typically with leading architects and primary contractors in the commercial sector, and provide a national and international service.

Whatever your project, we'll work with you to identify your precise needs, and then find the most efficient way to meet them. Drawing on expertise and insights from our talented in-house design team, structural engineers and project managers, we'll help you achieve outstanding performance and commercially viable solutions, on time and on budget.

Available CPD Material (3)

Multiple formats

Glass Partition System Applications and Performance Criteria

This seminar will highlight

- Different environments that glass partitions are used in.
- Advantages of using a proprietary system.
- Fire Safety-Approved document B
- Acoustic Performance –Approved Document E how to overcome sound transmission
- Protection Against Falling, Collision and Impact –AD K
- DDA Regulations –Approved Document M

This CPD can be delivered to you live and remotely.

Material type: Online Learning, Seminar

RIBA Core Curriculum: **Business, clients and services**
Design, construction and technology
Health, safety and wellbeing
Inclusive environments

Knowledge level: General Awareness

Multiple formats

The Glass Planet

Demonstrates the thought processes necessary when specifying the Architectural use of Glass.

- Makes the designer think about glass as a “material” for building.....not just a “product”.
- Provides guidance as to what specifications fit performance requirements.
- Helps the designer marry the technical resource with the aesthetic “design intent”.

Please note that for the foreseeable future this CPD seminar is only available in London and Southern locations. Alternatively, it can be delivered to you live and remotely.

Material type: Online Learning, Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

Industrial Style Panelled Glazing

This CPD aims to familiarise the architect and designer with the different construction methods, design options and specification issues of panelled style glazing. It will help you to understand the following topics:

- Understand construction methods of industrial style panelled glazing
- Understand design options, multi-panel, light and technology incorporation
- Understand biophilic design
- Understand acoustic performance levels

Material type: Seminar

Classifications

Subject/Product Areas (CI/SfB)

Structure

Internal walls, partitions > Relocatable, demountable partitions

Room dividers, internal grilles etc. > Room dividers

Suspended ceilings > Tiles, panels for suspended ceilings

RIBA Core Curriculum areas

Business, clients and services

Knowledge level: *General Awareness*
