## CPD Overview

---

The wedi Group is the leading manufacturer of an inert, dimensionally stable, lightweight, thermally insulating board that is waterproof to its core and is resistant to mould and fungi making it ideal for use in bathrooms, showers, wet rooms, steam rooms, spa and wellness industry.

wedi manufactures a product system designed to provide peace of mind for specifiers and installers when tiling in ever critical wet environments. With BBA Certification and testing to full EN standards, wedi offers a full technical support service and UK-wide delivery.

0.036 Wm/K - thermally insulating  
133kg/m2 vertically - loadbearing  
100% waterproof - no additional tanking required  
Directly tileable - no priming required

Thanks to the special, high-density Extruded Polystyrene Styrofoam® core (XPS), wedi products are eco-friendly with zero Ozone Depletion Potential and a Global Warming Potential of 1. Manufactured with 100% green energy and at least 25% recycled foam material, XPS elements have an EPD certificate.

Standard products include but not limited to:

The strategic focus is on a high degree of prefabrication and integrated technology to enable safe and easy installation.

wedi also offers a full bespoke service and can deliver:

2023 marks not only the 40th anniversary of the brand's foundation, but also new clever product introductions to the market. wedi's innovative solutions simplify and speed up the installation process and at the same time offer the highest level of system security.

Dedicated to people and the environment, wedi is a certified EcoProfit operation with certified energy (ISO 50001), environmental (ISO 14001) and quality (ISO 9001) management systems. Recently awarded a silver medal from EcoVadis the world's leading provider of sustainability ratings, wedi paves the way for a sustainable future - leading by example, the brand supports its customers, partners and suppliers in the responsible use of energy and environmental resources whilst inspiring creative and at the same time, functional bathroom design.

## Available CPD Material (3)

---

Multiple formats

### Building Board Solutions: The ultimate 100% waterproof, modular tile backer solution for wet areas

This CPD covers the key design considerations for wet and damp environments. It also provides a thorough comparison of suitable tiling substrates and looks in-depth at the properties and applications of building board and XPS design solutions. The CPD also covers in detail, the installation and fixing processes and any issues to overcome. By the end of the presentation, you should have a greater understanding of:

- The properties and the design potential of XPS building boards
- The key benefits of XPS over other tiling substrates
- The key installation requirements for common applications
- Specifying XPS building boards for a wet or damp environment

This CPD can be delivered to you live and remotely

Material type: Online Learning, Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

---

### Wet Room Solution

This seminar will help you:

- understand the features and benefits of a wet room system using extruded polystyrene (XPS) versus traditional construction materials
- understand the variety of designs, functions and sizes for both commercial and domestic applications
- understand the components that if used collectively achieve a CE approval for a 'seals for floors and walls in wetrooms'
- understand how to achieve accessibility for wheelchair users
- understand certifications on both fundo trays & boards with benefit to architects
- understand how to select the correct system dependent on the substrate

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**  
**Inclusive environments**

Knowledge level: General Awareness

---

### Building Boards and Wet Room Solutions

This seminar aims to:

- Enable listeners to make informed choices about the suitability of background substrates for tiling in wet/damp environments
- Help the audience understand British and European standards for tiling
- Provide guidance on the design and construction of trouble-free backgrounds for tiling
- Demonstrate how to create a completely waterproof, inert and dimensionally stable wet room

Material type:

Seminar

RIBA Core Curriculum:

Design, construction and technology

Knowledge level:

General Awareness
