CPD Overview

Balancing growing environmental consciousness with increasing demand for timber products demands a real commitment to minimising impact on the natural world.

International Timber is the UK's leading importer and distributor of sustainable timber and panel products. We are the timber specialists, providing responsibly sourced products and services for construction and joinery projects in every corner of the economy.

Wood is both a versatile and a renewable raw material, and 'building green' using wood helps to keep carbon out of the atmosphere, mitigating climate change. In line with this, sustainability and responsible sourcing are the foundation stones upon which our business is built; all our softwoods and hardwoods are chain of custody certified and legally verified where applicable.

We operate from four sites in the UK, offering a fast and responsive service. All our sites are ISO9001, ISO14001, ISO45001, FSC® and PEFC® certified.

As an integral part of the global Stark Building Materials UK limited, International Timber has the resource to invest continuously in facilities, stock and advanced production equipment, keeping products and services at the leading edge in terms of technology, efficiency and environmental awareness.

**Specifying Timber**

In the modern world of construction and mega projects. More and more Architects , specifiers and contractors are looking to use lightweight , natural and renewable building materials such as Timber. It is important to know how to specify timber for projects because not all timber is the same. Selecting the right timber for your project is vital and understanding how to specify is the first step towards lowering the impact of deforestation and sustainability. It is very important to get the specification right whe it comes to timber a sit can have a huge impact on your design, performance, life span and it can help prevent the use of ilegal timbers.
