CPD Overview

Established in 1995, Euroform Products is an innovative ISO 9001 accredited company specialising in building products and solutions for the construction industry, including: Building Boards and Fire Rated Boards (cement particle board, tile board), and External Cladding (timber-effect cladding). Continuous improvement is integral to the Euroform ethos, with products tested to BS standards and, in many cases, to the more onerous EN standards. A customer-focused business, Euroform offers a complete service, incorporating full technical support, comprehensive system solutions.

Fire and Sheathing Technical CPD

This Fire and Sheathing Technical CPD covers the principles of fire and the new building regulations with regards to high risk and high rise buildings as well as the use of sheathing boards within SFS through wall systems.

By the end of the CPD you should have a greater understanding of:

- The basics on fire principles.
- Current building regulations.
- Sheathing board applications.
- Through wall system design.

Material type: Online Learning, Seminar
RIBA Core Curriculum: **Design, construction and technology**
Legal, regulatory and statutory compliance
Knowledge level: General Awareness

EN Tested Fire Protection 'Futureproof Protection'

This seminar aims to show delegates:

- How to help prevent misspecifications of fire protection building boards
- How to increase awareness of importance of EN testing / tested products
- How to consider the extra performance required to meet with EN testing criteria
- Examples of misuse

Material type: Seminar
RIBA Core Curriculum: **Design, construction and technology**
Health, safety and wellbeing
Legal, regulatory and statutory compliance
Knowledge level: General Awareness

Sheathing Panels

This seminar provides a guide to sheathing panels, where they would be used, the different types of sheathing panels available and the associated benefits of various materials.

It will help you to understand the following topics:

- Understand the function of sheathing panels and identify the correct situations where they should be used and in what types of wall build
- Understand the types of sheathing panels available and the advantages and disadvantages of different sheathing panel materials
- Understand sheathing panel testing and the regulations and standards governing their use in various constructions

Material type: Seminar
