JOHN
CULLEN

CPD Overview

John Cullen Lighting – specialists in architectural lighting for over 40 years. John Cullen offers a complete service for all aspects of interior and exterior lighting whether contemporary or traditional.

Our internationally-acclaimed, discreet LED fittings provide clients, designers and architects with the tools to deliver outstanding lighting in all settings, from residential to hospitality, landscape and superyacht. Our range of discreet luminaires provide the tools to lower energy consumption and comply with the latest building regulations. All are designed in house supporting British manufacturing.

Our design team will help you achieve the best lighting design for your project. We offer a bespoke lighting design service where a site visit or showroom consultation can be arranged to put together a full plan and specification, from one room up to a whole house.

Our spectacular showrooms in London, Dubai and Paris showcase the latest in lighting technology, demonstrated through our unique room sets and custom-built lighting pods.

Our unique product collection is each chosen for its creative lighting effect, discreet appearance, performance and enduring design. The range includes recessed downlights, spotlights, uplights, wall lights, step lights, bathroom lights, shelf and picture lighting, lighting artwork and garden and exterior lighting.

New Generation Luxury Joinery Lighting

It is no easy feat designing lighting for luxury joinery - getting the perfect aesthetics for the space requires pre-planning and coordination. This CPD discusses what to look out for when incorporating lighting into joinery and examines the various applications and solutions using the lighting toolbox of new generation joinery luminaries. By the end of the presentation you should have a greater understanding of:

- The detail required for joinery lighting - pre-planning and coordination
- The layered lighting principles involved in joinery lighting
- What to consider - including awareness of surface finishes and considering the objects being lit for best effect
- How to apply the appropriate LED fittings to the right applications
- The control systems that can be used and applied for best results

This CPD can be delivered to you live and remotely.

Five Top Lighting Design Tips

Lighting is one of the most powerful interior design tools. It can change the mood and atmosphere of interiors and landscapes at the touch of a button to literally decorate with light. With LEDs now lasting longer than before, it is more important than ever to consider the lighting design and the fittings you choose carefully as your clients will live with them for longer.

- Read key pointers when planning lighting layouts
- Learn the importance of layering light and what it brings to a scheme
- Understand what to look for when selecting LEDs
- Think about creating different zones in larger spaces
- Understand the difference good lighting control brings to a scheme
