CPD Overview

At Karndean, we see flooring differently. We travel the world in our quest to bring you exceptional floors that inspire and delight. From the ancient forests of Europe, to the remote Australian outback and beyond, we seek out expressive and intriguing forms in the natural world to influence our unique floor designs. By combining these original features with cutting edge design, we create simply beautiful floors that bring your vision to life. We take our clients on an endless journey of design discovery.

Inclusive Flooring Design: Where Form and Function Meet Legislation

The presentation discusses the key design criteria to consider, when designing flooring for environments where vulnerable people are present; including the visually impaired, patients with dementia, and the elderly. The key topics covered include;

- Designing floors for the dementia environment
- Reducing the risk of slipping
- Complying with the Disability Discrimination Act
- Colour contrast and light reflectance values
- Maintaining hygienic floors
- Environmental credentials
- Case studies

This CPD can be delivered to you live and remotely.

Material type: Online Learning, Seminar

RIBA Core Curriculum: **Design, construction and technology**
Inclusive environments

Knowledge level: General Awareness

Luxury Vinyl Tile Floor Coverings: Stylish and Innovative Specification Solutions

This seminar will look at:

- The makeup of Luxury Vinyl Tiles (LVT), the reasons behind using it and the environmental credentials
- EN classifications, slip resistance and technical considerations
- BREEAM and life cycle assessment
- Wear layers, thickness, emboss, bevel and adhesives
- Subfloor preparation and ease of maintenance

This CPD can be delivered to you live and remotely.

Material type: Online Learning, Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

Specifying Sustainability; Protecting People, Planet and Prosperity

This CPD will explore how in recent years design sustainability and the implementing of design features has evolved into a more people-centric approach with places, health, and wellbeing at the core of the design process. Topics discussed include how a building's occupants are directly affected by specific elements within the built environment, Indoor Environment Quality (IEQ), how design should be considered at the beginning to improve the overall experience of the occupants over the lifetime of a building, and different design solutions and their sustainability. By the end of the CPD you should have a greater understanding of:

- The effects natural and man-made design elements can have to occupant health, both physically and psychologically
- The different elements of IEQ and the preventative solutions that can be taken to control the source
- How to assess the positive and negative impact on occupant experience and how this can be altered through building design
- The scope of design solutions that can be implemented
- How to assess the sustainability of these design solutions - understanding what green practices can be put in place and how through sustainable solutions we are protecting our resources: people and planet, to ensure a prosperous future

Material type: Seminar

RIBA Core Curriculum: [Design, construction and technology](#)
[Health, safety and wellbeing](#)
[Sustainable architecture](#)

Knowledge level: General Awareness

One Day Introduction to Fitting Flooring

- Acclimatisation
- Product awareness
 - Adhesive selection
 - Sub-floor testing and preparation
 - Straight tile installation
 - Straight plank installation

Material type: Course

RIBA Core Curriculum: [Design, construction and technology](#)

Knowledge level: General Awareness

LVT Resilient Flooring Coverings

- Using modern materials
- Design
 - Practicality
 - The Environment
 - Technical specifications
 - Building Regulations

Material type: Seminar

How BIM is Benefitting the Construction Industry and our Clients

Where has BIM come from?

- What are the misconceptions about BIM?
- Who is BIM for?
- How does BIM benefit?
- How does BIM fit in with specification and the RIBA Plan of Work?
- BIM, concept through to facilities management
- BIM as a major cost saving
