CPD Overview

Metrotile UK supplies Lightweight Steel Roofing systems to the UK and Irish markets and is part of an international success story that has been in operation for over 30 years. Our systems and accessories can be seen upon rooftops in over 60 countries worldwide.

By using steel as the base material, it means the profiles can be pressed much thinner than a traditional slate or clay tile. The sheer strength of steel means that a Metrotile roof is far more durable and incredibly secure, whether held up against petty vandalism or the most extreme weather conditions.

Suitable for pitched roofs as low as 10 degrees and up to 90 degrees for vertical cladding, a Metrotile roof can provide all the characteristics a traditional pitched roof covering can provide as well as the following additional benefits:

Metrotile can also offer a more sustainable approach to roofing as all tiles contain a minimum of 25% recycled steel and is 100% recyclable at the end of its life cycle. Installing a Metrotile roof can also reduce the amount of deliveries required due to the large amount of square meterage on each pallet.

Metrotile tiles are suitable for all pitched roofing applications including:

Available in a variety of colours, Metrotile profiles come with a 40 year weatherproof guarantee.

Available CPD Material (2)

**Sustainable Lightweight Roofing Solutions**

This seminar will provide information on:

- Roofing problems and solutions
- Vandalism problems and solutions
- Burglary problems and solutions
- Enhanced security
- Profile choices
- Whole life cost
- Health and safety
- Environmental and enhanced Eco Points
- Guarantees

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**
Health, safety and wellbeing
Sustainable architecture

Knowledge level: General Awareness

Multiple formats

To be submitted
