CPD Overview

Flex-R are exclusive distributors of Rubberbond™ Fleeceback EPDM, LQD-PUR Liquid Waterproofing, ClassicBond EPDM and ClassicBond PRO Fleece Reinforced EPDM throughout the British Isles. Our range of EPDM products and accessories are manufactured by Carlisle-Syntec™ in the USA. The history of Carlisle and Flex-R is built on EPDM, which has grown in popularity over recent years due to its excellent waterproofing capabilities & simplicity of installation.

Over half a century ago, Carlisle revolutionised the flat roofing industry with EPDM membranes, establishing a track record of superior performance and quality that is our hallmark. Today over 1.4 billion square metres of Carlisle EPDM membranes have been installed around the world in a range of climates. An EPDM roof will expand and contract along with temperature changes, allowing it to perform like new for decades.

Roof Refurbishment: A Guide to Best Practice

This CPD will help specifiers to understand the refurbishment process and how to arrive at the best solution for their project. The seminar offers a step-by-step approach and explores recognising the existing roof and deck and how this can affect design decisions, what to expect from a roof survey, through to specifying the correct insulation and system for the roof. Examples of best practice are illustrated through case studies. By the end of the CPD you should have a greater understanding of:

- When to overlay a roof and when to strip the coverings
- What to expect from suppliers and legislative and statutory information
- The different types roof types and decking a specifier could encounter and how to approach them
- How to select the correct insulation and roofing system for your project and how to factor out common problems
- Compliance with UK British Standards and Codes of Practice

This CPD can be delivered to you live and remotely

Material type: Online Learning, Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

Guide to Specifying the Correct Flat Roofing System

This seminar covers the different flat roofing systems and how to select the best roofing system for your project, including when to specify single ply or liquid waterproofing systems. It will help you to understand the following topics:

- Design considerations including the client's brief and ensuring compliance
- The waterproofing solutions available
- The insulation options available
- Green roofing solutions
- What support is available to assist you with your designs
- Detailing, compatibility and interfaces

This CPD can be delivered to you live and remotely
