CPD Overview

Shield Membranes possess over 50 years of knowledge and experience in the roofing and construction industry,

Manufacturing in the UK allows us to service our UK customers and clients and keep lead times to a minimum. We support our clients with the most thorough design and technical support to aid them to have the best systems available. With the support of our industry leading systems as well as our experienced and professional team of designers, managers and contractors we are able to take on any size project and give you or your client's projects, our complete and unbeatable service from start to finish.

Each part of the manufacturing process, from raw materials to the end product are subject to constant quality checks to ensure the highest standard. We believe in constant improvement, and invest yearly in research and development. We are holders of the internationally recognised, ISO 9001:2015 certificate that emphasises commitment to quality. Our R&D department is dedicated to the continual development of our products and systems, to keep us at the forefront of the roofing and construction industry. Every product we manufacture is tested in our in-house lab to ensure it is the highest quality every time.

We pride ourselves in building long standing relationships with some of the UK's leading merchants, clients, specifiers, main and specialist roofing contractor whilst aiming to follow suit with professionalism.
