## CPD Overview

---

As part of our ongoing quest to challenge the status quo with revolutionary solutions for the facade market, OBEX are proud to supply the FR alternative to EPDM.

The OBEX CORTEX® FR Sealing System covers every sealing scenario against water and air ingress in facades and commercial glazing scenarios where a high fire classification is necessary. Our core range has been designed to service the immediate requirements of contractors with products engineered to the highest standards, whilst our team continue to develop and expand this range to offer an extensive fire-rated solution.

Our fire-rated sealing system is the leading alternative to EPDM and is available exclusively from OBEX. Please contact our team for full technical specifications and required samples.
