CPD Overview

Tremco Roofing (a brand of Tremco CPG) is a leading manufacturer of waterproofing systems with over 70 years of experience within the UK construction industry. Our aim at Tremco, is to provide clients with waterproofing solutions suitable for both new build and refurbishment projects, with the view to ensure that buildings are watertight, compliant, and future proofed.

Our extensively tested range gives us the ability to recommend the correct solution for each project. The systems offered by Tremco include cold applied liquid membranes or reinforced bituminous membrane solutions for flat roof applications and come fully supported by a team of experts.

Tremco Roofing systems have undergone third party testing with the British Board of Agreement (BBA), to give the assurance to architects, specifiers and building owner that all systems recommended and installed are in line with the most recent building standards. Our systems also come with warranties, once a final site inspection has been completed and signed off by a member of our technical team.

A brand of Tremco CPG, we pride ourselves on excellence in customer service, technical support, and service delivery. Working in unison with our sister brands, here at Tremco Roofing we can offer an array of products for all stages of your projects.

Tremco CPG is committed to shaping the future through innovative approaches and sustainable solutions. Providing the solutions to engineer structures that are more efficient to build and maintain, are virtually impervious to the elements, can provide a multitude of desired finishes.

With an experienced technical and sales team, we are positioned to aid with specification, application-specific enquiries, product development, problem solving and assistance on-site. So, when it comes to protecting the entire building envelope, CPG UK is the best choice for single-source products, services, and solutions.

Available CPD Material (3)

Surface Membranes and their Applications

This seminar provides a review of the causes of failure in floor coverings, the role of moisture content in concrete and test, methods. The preparation and application of surface damp proof membranes.

This material was assessed and approved in 2008.

Material type:

Seminar

RIBA Core Curriculum:

Design, construction and technology

Knowledge level:

General Awareness

A Guide to the Specification of Cold Applied Liquid Waterproofing

The seminar provides clarity around the selection and use of Liquid Applied Waterproofing Systems (LAWS). There is a large - and increasing - choice of systems available to the specifier. This presentation explains the difference between them, and how one goes about selecting a system that is appropriate to a particular application.

This content was assessed and approved in 2011 and last revised in 2014.
