## CPD Overview

---

As the UK's largest manufacturer of Cortizo Cor Vision, we manufacture the only Cor Vision with PAS 24 as a result of carrying out numerous improvements to the base product. As system designers we have our Deco line 34mm outer frame double glazed thermally insulated aluminium door system designed to give the steel door effect with the thermal efficiency of aluminium. We also manufacture the largest glazed pivot door available from a UK manufacturer. In addition to the above specialist products, we can offer electronic locking with app control.

Along side these we manufacture tilt and turn windows, the Cortizo hidden sash window and bi fold doors.
