Sample Smarter - A guide to working sustainably with samples

Samples are needed for every project, but returning or disposing them can be problematic. Some manufacturers will take samples back, but quite often this isn't the case. This then causes the designers sample library to be full of samples that they no longer need and creates a recycling problem. This CPD covers a wide range of topics to help teams understand the impact of sample waste and what can be done to reduce it.

Material type: Online Learning, Seminar

RIBA Core Curriculum: **Design, construction and technology**
Sustainable architecture

Knowledge level: General Awareness
