Top 10 things to consider when looking to Smoke Control Specifications

This module aims to ensure the audience has the basic understanding of what to look for when reading through or writing smoke control specifications; summarised to the top 10 critical areas to pay attention to.
By the end of the CPD you should have a greater understanding of:
- product/test/classification standards, to define the correct working framework
- CE marking and know what documents to ask, to compare product performances correctly
- how to have a proactive role in designing good looking building and complying to smoke control requirements effectively
- what to ask to 3rd parties when asking for expert consultancy
- what to look into products data sheets, how to use them in design, achieving noise prescriptions & free areas
