CPD Overview

Our product is a browser-based application that leverages a novel combination of generative Artificial Intelligence (AI) and Machine Learning (ML) models to assist Architects with their work.

We're starting with image production of their designs by making it 100x faster than current solutions and by removing existing technical barriers.

Gendo removes the need for a whole set of software licences, removes the need for architects to upskill in technical image production, and removes the requirement to buy and maintain powerful, expensive hardware.

Create beautiful CGI in minutes, not days.
