CPD Overview

Hardscape supply hard landscaping materials and are industry leaders in the development of ultra- low carbon granite-topped concrete blocks and innovative Artscape solutions that requires artwork within the public realm. We help to create visionary urban spaces through the sourcing and supply of creative and inspirational materials for landscape architects and local authorities to specify. Hardscape have supplied thousands of projects over the years, and enjoy a respected and proven standing in the construction industry. We supply all types of natural and man-made materials which include integrated infrastructure solutions to encompass cycling, pedestrians and vehicle interaction, also permeable and grass paving products to all types of public realm and regeneration projects, as well as government and commercially funded schemes across the United Kingdom.
