**Available CPD Material (3)**

Multiple formats

## A Guide to Sealing Façades , Windows & Doors, in Relation to Part L: 2022 Update (Surface Membranes and Tapes)

Due to the more onerous implementation of Part L 2022, the CPD seeks to highlight the designer's obligations in respect of airtightness and the code of practice for the control of moisture in buildings according to BS5250.

It will give guidance on best practices concerning the tapes, membranes and sealants used to reduce unplanned air loss and the management of moisture migration through the fabric layers.

The CPD is weighted towards structures with framed and sheathed backing walls.

By the end of the CPD you should have a greater understanding of:

- The proper usage and function of sealing materials used around windows, doors and on facades
- The impact of unplanned air loss on building physics & how to meet SAP/SBEM pledges
- Available materials that meet the requirements of Approved Document B
- How to avoid common design mistakes leading to improved and compatible sealing strategies

Material type: Online Learning, Seminar  
RIBA Core Curriculum: **Legal, regulatory and statutory compliance**  
Knowledge level: General Awareness

## Timber Frame Construction. Differential Movement – Considerations relating to window installation.

This seminar will discuss:

- Timber frame
- Timber considerations
- Differential movement
- Product applications
- Weather tightness
- Air tightness

Material type: Seminar  
RIBA Core Curriculum: **Design, construction and technology**  
**Sustainable architecture**  
Knowledge level: General Awareness

### A Guide to Detailing of Interfaces on Windows and Facades

To gain awareness of relevant legislation affecting the consideration of interface solutions.

- To gain understanding of the functional criteria involved.
- How to undertake robust sealing - product solutions and examples of bad practice.
- Alternative product solutions.

Material type:

Seminar

RIBA Core Curriculum:

**Design, construction and technology**

Knowledge level:

General Awareness

## Classifications

---

### Subject/Product Areas (CI/SfB)

Structure

Windows > Wood windows

Lintels, sills, weatherbars, other window/door parts > Weatherbars

General products

Sections, including tapes > Tapes

Adhesives, sealants, gaskets > Joint sealants and fillers

### RIBA Core Curriculum areas

Legal, regulatory and statutory compliance

Knowledge level: *General Awareness*

Design, construction and technology

Knowledge level: *General Awareness*

Sustainable architecture
