CPD Overview

DANOSA UK Ltd is one of the UK's leading suppliers of PVC Single Ply Membranes, Cold-Applied Liquid Waterproofing, and Reinforced Bituminous Roofing Felt. More than just a pricelist to our Partner Contractors and more than a waterproofing brand to our valued Architectural and Specification clients, the DANOSA approach is founded on providing clear, informative instruction from the earliest conception, throughout the design process and to all parties when delivering the completed project. By building together, we ensure that DANOSA flat roofs provide a long lasting solution for many years to come. Equipped to face the many challenges that a modern design can bring, DANOSA has developed a variety of detailing solutions and products, such as our extensive range of Integrated Fixing Point (IFP) products, which deliver robust long-term solutions. Our services include u-value and condensation risk calculations, rainwater flow calculations, fall protection system design, living roof system design and wind uplift calculations along with many other bespoke solutions. We offer the latest Technical Guidance on any issue and together, we can provide you with a DANOSA-Assured waterproofing system, warranted with comprehensive single-point cover and insurance backing.
