CPD Overview

As one of the UK's leading suppliers, we're committed to providing the finest traditionally manufactured bricks. We're a family business and passionate about what we do. Our brick offering includes not only handmade, but also extruded and pressed bricks. We are specialists in developing bespoke regional variations of our bricks, in both imperial and metric sizes and in standard, weathered and reclamation finishes. Many of our ranges are also available as brick slips for internal and external use. Quality is at the core of our business throughout our brick ranges, services and customer experiences. Our skilled brickmakers reproduce brick colours and textures found across the UK, using traditional manufacturing methods. As innovators within our industry, we continue to develop modern techniques and processes combined with hand finishing to replicate those age-old brickwork appearances.

All our bricks undergo rigorous independent testing by recognised third-party bodies and are UKCA marked to meet British standards. The transparency of our supply chain is integral to us and our manufacturing partners all meet the strict brick quality, supply and ethical standards set out in The Imperial Standard.

We are more than just a supplier of traditional bricks. Our team holds over 150 years' experience within our industry which enables us to offer expertise, guidance and advice to our customers. You can be assured that whatever the size or type of project you are working on, we will always be available to help and support.

Available CPD Material (2)

Revolutionising Restoration

The seminar guides you on how to select the right brick for renovation, restoration and traditional new build projects. By the end of the CPD you should have a greater understanding of:

- The history of UK brick making
- The range of brickwork bonds used
- The regional variations in brick size, colour and texture
- The production process of handmade bricks
- Brick types and sizes
- The benefits of using traditional handmade bricks in conservation, heritage and traditional new build projects
- How to problem solve

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

Innovative Brick Match Solutions: A Practical Guide to Achieving the Best Brick Match

This seminar will explore brick matching techniques. It will help you to understand the following topics:

- How to recognise brick types, properties and characteristics and their application to aid the brick matching specification process
- Remedies for matching weathered and aged brickwork
- Brick blending
- Economical colour correction
- Considerations for additional brickwork aesthetics
- The use of brick slips for interiors and external facades
