Specifying The Correct Loading Bay

This short programme has been developed to give a clear technical understanding of how to specify the correct loading bay solutions with individual components for a project. It has been designed to give you knowledge on key aspects of loading bays and aims to provide a clear understanding of the safety requirements and standards to ensure you meet the needs of both the builders and the client.

Material type:	Online Learning, Seminar
RIBA Core Curriculum:	Design, construction and technology
Knowledge level:	General Awareness

General Awareness

Specifying the Correct Door

This seminar offers guidance on specifying the correct door for the right application. It covers the types of doors available for both domestic and industrial applications and looks at the features and points for consideration for each type of door. This seminar helps the specifier to understand the following topics.

- The main differences between door types including up and over doors, sectional overhead doors, roller doors and high speed doors
- How to specify the correct door for the right application
