CPD Overview

Kawneer offers a comprehensive range of high-performance architectural aluminium building products and systems.

Our products include unitised curtain wall solutions, 'stick' and SSG (structural silicone glazed) curtain wall products, windows, doors and framing systems. Kawneer also offer building facade design expertise, combined with aluminium's flexibility and recyclability, making our building systems and products the right choice.

We have multiple facilities around the globe including North America, Southwest Europe and Benelux. At our UK manufacturing facility in Runcorn, we extrude aluminium, incorporate thermal break technology and also apply our own finishes and paints with our Qualicoat licensed chrome free paint process. This offers us total control of product quality, lead times and distribution.

Available CPD Material (7)

**Windows for Health: Specifying for the Healthcare Market**

This seminar will help you to:

- Understand what the key drivers are within the healthcare sector
- Understand who the decision makers are
- Specify with the end user in mind
- Identify the most popular window types

Material type:

Seminar

RIBA Core Curriculum:

Design, construction and technology

Knowledge level:

General Awareness

**Offsite Construction - Unitised Curtain Walls**

This seminar aims to help architects understand the benefits of offsite construction and how unitised curtain walls are tested, manufactured and installed. It discusses modern methods of construction, the testing regimes and installation.

Material type:

Seminar

RIBA Core Curriculum:

Design, construction and technology

Knowledge level:

General Awareness

**Curtain Walls: Classification, Design and Testing**

This seminar aims to give specifiers an understanding of design concepts relative to weathertightness in curtain walls, their classification based on fabrication/installation, and the testing regimes with which they have to comply.

Material type:

Seminar

RIBA Core Curriculum:

Design, construction and technology

Knowledge level:

General Awareness

Aluminium Windows- Sustainability and Specification

This seminar aims to provide an understanding of the options available when specifying windows for the different applications they may have.

Material type: Seminar
RIBA Core Curriculum: Design, construction and technology
Sustainable architecture
Knowledge level: General Awareness

Aluminium: Part of a Sustainable Future

This seminar aims to give a clear understanding of the life-cycle of aluminium, how easy it is to re-cycle and highlights green solutions.

Material type: Seminar
RIBA Core Curriculum: Design, construction and technology
Sustainable architecture
Knowledge level: General Awareness

Approved Document F 2010: Means of Ventilation

This seminar provides the facts concerning the understanding and application of the requirements of AD Part F 2006 - means of ventilation buildings

Material type: Seminar
RIBA Core Curriculum: Design, construction and technology
Legal, regulatory and statutory compliance
Knowledge level: General Awareness

Approved Document L 2010, Scottish Building Standards Part 6 2010: Its Impact on Glazed Aluminium Facades

This seminar aims to help the specifier to understand the revisions made to the Approved Document L and how it impacts on the design process for new and existing buildings, with particular reference to the glazed building envelope.

Material type: Seminar
RIBA Core Curriculum: Design, construction and technology
Legal, regulatory and statutory compliance
Sustainable architecture
Knowledge level: General Awareness
