CPD Overview

Available CPD Material (5)

Building a Modular Future-NLU

Modular construction refers to the construction of a building using individual prefabricated elements manufactured off site. This seminar emphasizes the factors to consider when adopting modular construction, as well as the major role architects and contractors play in realising its full potential.

Throughout this seminar, you will learn about:

- What modular construction is and its legacy
- Modular vs conventional construction
- The benefits and potential of modular construction
- Factors to consider modular construction
- How to get the most from modular construction

Material type: Online Learning, Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

Building a Modular Future

This CPD will provide an understanding of the history, background and principles of modular and offsite technology and, how it can contribute to a more efficient, sustainable and safer method of construction.

The presentation also offers an insight and overview of the considerations for the architect in approaching a modular approach and the benefits vs traditional construction methods.

Material type: Online Learning

RIBA Core Curriculum: **Design, construction and technology**
Sustainable architecture

Knowledge level: General Awareness

Decanting without Compromise

This seminar will:

- Present the decant solutions available in the UK market place
- Present the latest innovations
- Show how architects can use this solution to help their customers
- Change perception of modular buildings available on hire

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

How Off Site Construction is Changing the Face of Modern Britain

This seminar will provide information on:

- Modular building systems
- What is offsite construction
- Advantages of offsite construction (economic, environmental, to the customer)
- The modular building process from start to finish

Material type:

Seminar

RIBA Core Curriculum:

Design, construction and technology

Knowledge level:

General Awareness

Changing Design Perceptions: Providing Building Solutions

This CPD presentation is designed to provide an overview and insight into the modular construction industry and give insight into the process from initial concept through to delivery of completed project. It aims to address any preconceptions or limitations modular construction is perceived to have.

Material type:

Seminar

RIBA Core Curriculum:

Design, construction and technology

Knowledge level:

General Awareness
