CPD Overview

Stressline are a leading manufacturer and provider of structural building products including Concrete and Steel Lintels, Cast Padstones, flooring systems, and decorative products like fencing and walling products. We have built a reputation over 50 years, and have a dedicated specification and technical team. Contact us now.

Available CPD Material (2)

**Thermal Flooring: Making it work for you**

This article looks at why thermal flooring is important and how it works. It also examines exactly how the required u-values can be achieved and how this helps housebuilders when it comes to complying with building regulations such as Part L and SAP ratings. By the end of the CPD you should have a greater understanding of:

- The types of thermal flooring available in the market
- What u-values are and how they relate to thermal flooring
- Understand what specification requirements need to be advised for thermal flooring
- How manufacturers achieve specified u-values
- Live examples of thermal flooring in construction
- Alternatives to thermal flooring

Microlearning

**Lintel Intel: Specifying Lintels for New Homes and RMI**

This seminar is concerned with lintel specification and the common challenges that arise. It gives tips and advice to help make specifying easier and will help you to understand the following topics:

- The types of lintels available and their applications
- How lintel materials compare and the different properties of steel and concrete lintels
- What to consider when specifying lintels and the consequences of under and over specification
- The common challenges manufacturers of lintels face from specification
