Powder Coatings for Architecture

This seminar provides an understanding of architectural powder coatings, often known by the acronym PPC (Polyester Powder Coatings) in specification, and how they are used to provide long-term decorative protection for aluminium and galvanised steel components.

After this seminar, attendees will:

- Understand the different applications of these products in the built environment and the aesthetic options in terms of colour range and finish.
- Have an insight as to how the products are manufactured.
- Understand the importance of the correct application process.
- Be aware of the standards and testing procedures that apply to PPCs.
- Be familiar with the performance classifications of the products, their typical applications and guarantees.
- Be informed on the sustainability credentials of the products.

This seminar can be delivered live, either face-to-face or online.

Material type:	Online Learning, Seminar
RIBA Core Curriculum:	Design, construction and technology
Knowledge level:	General Awareness
