CPD Overview

Available CPD Material (2)

Modular demountable and relocatable steel partitioning

A clear overview of modular steel partitioning, explaining the types of product available and the applications and environments in which they are required to be specified. It will describe the benefits of steel partitioning over some other options and inform of some of the standards and classes of cleanrooms, together with all other environments and applications applicable, further illustrated by some interesting case studies.

Material type:

Seminar

RIBA Core Curriculum:

Design, construction and technology

Knowledge level:

General Awareness

Modular Demountable Steel Partitioning

This seminar looks at demountable steel partitioning and how it can be used in various applications and environments. It will help you to understand the following topics:

- Understand how to select demountable steel partitioning according to initial design and ongoing requirements
- Understand how to specify appropriate single or double skin steel partitioning
- Understand cleanroom partitioning and ISO 14644 cleanroom classifications
- Understand fire rated steel partitioning systems

Material type:

Seminar

RIBA Core Curriculum:

Design, construction and technology

Knowledge level:
