## CPD Overview

---

Britmet Lightweight Roofing is a privately owned business that manufactures in the UK and strives to achieve the highest levels of satisfaction and quality in the industry. Our vision is to provide products and support that go above and beyond the competition, adding value to our clients through innovation, sustainability, and service.

Britmet Lightweight Roofing offers a unique and bespoke service to our customers. We have over 40 years of experience working on countless projects with councils, housing associations, architects, surveyors, contractors and many more all over the UK. We are proud to offer our customers an array of services such as feasibility and budget quotations, site surveys, NBS specifications, technical drawings for FREE as part of our system!

We provide you with a Britmet representative, from your area, as the main point of contact for general guidance throughout the project. They are available for meetings and site visits before, during and upon completion of the project, to ensure the installation meets the manufacturer's specification and is subsequently signed off with a 40-year guarantee. We are here for you from concept to completion.

We work with a national network of experienced, approved Britmet installers to ensure successful project installations. We can also provide extensive training to new contractors to gain an 'Approved Britmet Installer' status.

Britmet is proud to provide our clients with a 'project assist' service. This allows our team to undertake some, or even all, of the project on your behalf. We can reduce your workload and even speed up the project process by taking care of any technical, planning or structural requirements you may need.

Project assist lightens the workload for our clients where necessary. For specific projects or wherever required, Britmet offers this service to undertake work on behalf of our clients such as planning drawings and submission, structural calculations, building control, rainwater calculations and more. We will collate and finalise a project for the tender stage as early as possible, saving you time and money having to outsource help. With Britmet you will have one point of contact through the entire project, ensuring everything is moving along smoothly.
